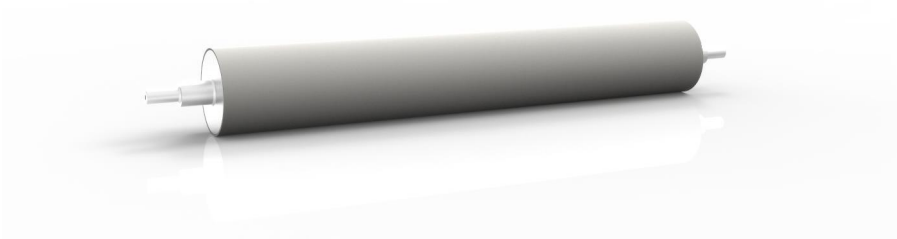
Titan



Cover Type:	Composite
Possible applications:	Wire, Felt and Sheet rolls (Breast, forming, table, guide... rolls)
Hardness Range:	90 Shore D
Available Colours:	grey
Recommended Cover Thickness:	min. 5 mm - max. 15 mm
Temperature resistance:	Dry: continuous 110°C / peak 120°C
Properties and advantages:	Doctorability Improved wear resistance in comparison to rubber covers High temperature resistance
Doctoring:	Steel, fiberglass or plastic blades
Possible surface design:	Possibility of helicoidal, parallel or chevron grooving
Chemical resistance:	Acid solutions: Excellent Alkaline solutions: Very good Hot water and steam: Excellent Ozone: Excellent Oil and grease: Very good Chlorinated solvents: Good Polar solvents (MEC, ether, acetate,...): Good
Recommended cleaning products:	Good resistance to standard chemicals normally used in paper machines
Remark:	Reference list available on demand
