

Micrograf

Cover Type:	Foam rubber	
Possible applications:	Pressure roll for gluing in splicer	
Recommended Cover Thickness:	min. 10 mm - max. 40 mm	
Temperature resistance:	Dry:	continuous 80°C / peak 90°C
	Wet:	continuous 70°C / peak 80°C
Properties and advantages:	Very high flexibility	
	Constant Elasticity	
	Perfect flatness of the gluing	
	Elimination of air bubbles when gluing	
Chemical resistance:	Acid solutions:	Not suited
	Alkaline solutions:	Not suited
	Hot water and steam:	Not suited
	Ozone:	Good
	Oil and grease:	Not suited
	Aromatic solvents (toluene, benzene,...):	Not suited
	Chlorinated solvents:	Not suited
	Polar solvents (MEC, ether, acetate,...):	Not suited
Recommended cleaning products:	Water and compatibles solvents
