

NipFoil-D

Cover Type:	Rubber
Possible applications:	Production of plastic film, adhesives and flexible packaging : conveyor, contact and lay-on rollers for winding
Hardness Range:	65, 80 Shore A
Available Colours:	black
Recommended Cover Thickness:	Standard 15 mm
Temperature resistance:	Dry: continuous 110°C / peak 130°C Wet: continuous 80°C / peak 90°C
Properties and advantages:	Special double layer technology with very soft base layer to reduce wrinkle formation during winding Harder outside layer assures good abrasion resistance and long lifetime Entirely antistatic Good and neutral behavior in contact with plastic film
Specific characteristics:	Antistatic
Chemical resistance:	Acid solutions: Excellent Alkaline solutions: Excellent Hot water and steam: Very good Ozone: Excellent Oil and grease: Not suited Aromatic solvents (toluene, benzene,...): Not suited Chlorinated solvents: Not suited Polar solvents (MEC, ether, acetate,...): Excellent Alcohols (ethanol, IPA,...): Excellent Ageing resistance: Excellent
Recommended cleaning products:	(Hot) water, acid and alkaline cleaners, IPA and alcohol, MEC, ether, ethyl acetate
