

Resistoplast 115

Cover Type:	Special rubber																		
Possible applications:	Tissue paper converting : embossing roller for hot embossing (high temperature up to 150 °C = 300 °F under continuous duty)																		
Hardness Range:	60 Shore A																		
Available Colours:	black																		
Recommended Cover Thickness:	min. 10 mm - max. 20 mm																		
Temperature resistance:	Dry: continuous 150°C / peak 160°C																		
Properties and advantages:	<p>Dynamic properties optimized for perfect behaviour in the nip during high temperature embossing (between 120 and 150 °C = 250-300 °F)</p> <p>Multi-layer solution for improved distribution of the nip pressure</p> <p>Very stable mechanical and dynamical properties up to 150 °C (300 °F)</p> <p>Very high abrasion resistance, long lifetime</p>

Acid solutions:	Moderate																		
Alkaline solutions:	Good																		
Hot water and steam:	Good																		
Ozone:	Very good																		
Oil and grease:	Excellent																		
Aromatic solvents (toluene, benzene,...):	Moderate																		
Chlorinated solvents:	Not suited																		
Polar solvents (MEC, ether, acetate,...):	Not suited																		
Alcohols (ethanol, IPA,...):	Very good																		
Recommended cleaning products:	(Hot) water, soap, most industrial cleaners, alcohol, light fuel, terpentine, white spirit
