Diamantal® HT

Composite	
Soft Calender, Super Calender, MultiNip > 120°C)	Calender in hot environment (surface T°
88, 91 Shore D	
white, yellow	
max. 15 mm	
Dry:	continuous 130°C / peak 150°C
Optimum abrasion resistance (limited ris High impact resistance Optimal dynamic modulus Optimized heat build-up (low energy loss Optimised temperature resistance	. ,
Continuous oscillating doctoring recomn 20 deg, Blade load 30 to 50 N/m	nended with steel or carbide blade, 15 to
Maximum surface Delta T : 10°C on wid	th 50 mm, 30°C between tapers
Maximum specific nip pressure : 700 kg/	/cm² (70 MPa)
Acid solutions: Alkaline solutions: Hot water and steam: Ozone: Oil and grease: Chlorinated solvents: Polar solvents (MEC, ether, acetate,):	Excellent Very good Excellent Excellent Very good Good Good
Good resistance to standard chemicals	normally used in paper machines
Reference list available on demand
