

YOUR REQUIREMENTS

- Constant quality
- Very high purity and homogeneity
- Chemical resistance
- Cut-in resistance
- Surface properties for improved transfer and the application of the coating
- Easy to grind

THE ADVANTAGES OF MONKAL®

- Constant quality
- Unique casting technology in vertical position
- Double filtering
- Special formulations for colour coating and chemcoating
- Silky surface, easy to grind
(Ra roughness values between 0,6 and 2 μ)
- Surface tension properties that improve the spreading and transfer of the coating
- Available hardness: 40 - 65 shore A

COLOUR COATING & CHEMCOATING

The evolution towards value added strip products (steel, aluminium or other non-ferrous materials) has caused an increased importance of coil coating applications.

Furthermore, the use of coating machines has become the preferential technique to apply "chemical" coatings, such as passivation and pre-treatment products or water-based coatings.

No doubt, the heart of the coil coating machine, used to apply liquid coat-

ings, consists of the applicator roller, which is elastomer covered. This roller has a crucial impact on the quality of the coated product.

The Hannecard Group has become a specialist throughout Europe and even worldwide, thanks to the development of a superior covering concept, including technologies and compounds that assure an important improvement of the coil coating process.

Double side colour coating

Double side chemcoating

Range of coverings

Name	Type	Application
Monkal	Polyurethane Beige, 40-65 shore A	Coating
Monkal 4	Polyurethane Beige, 40-60 shore A	Coating, chemcoating
Monkal 5	Polyurethane Green, 50-60 shore A	Coating, chemcoating
MultiCoat-SB	Rubber Green, 35-65 shore A	Coating, chemcoating
MultiCoat-XP	Rubber Green, 45-60 shore A	Chemcoating
