

## HANNECARD LAUNCHES ANTI-ADHESIVE ROLL COVERING 'LOTUS'

***Ronse, July 25, 2007 - Following a period of elaborate testing, Hannecard is proud to launch its new and revolutionary roller covering named LOTUS.***

By combining a Teflon®-surface and one of our high-end roll covering qualities, Lotus disposes of an incomparable set of properties: a non-stick surface, high temperature resistance, complete chemical resistance and remaining elastic properties. These characteristics will undoubtedly make it a valuable improvement for a large number of applications in the converting, printing, paper and other industries.

If you like to receive more information on this product, please download the product sheet from our website [www.hannecard.com](http://www.hannecard.com) or contact your local representative.

LOTUS will also be showcased at [the Hannecard-booth \(Hall 15/C26\) at Drupa.](#)
