

WE'VE GOT YOU COVERED

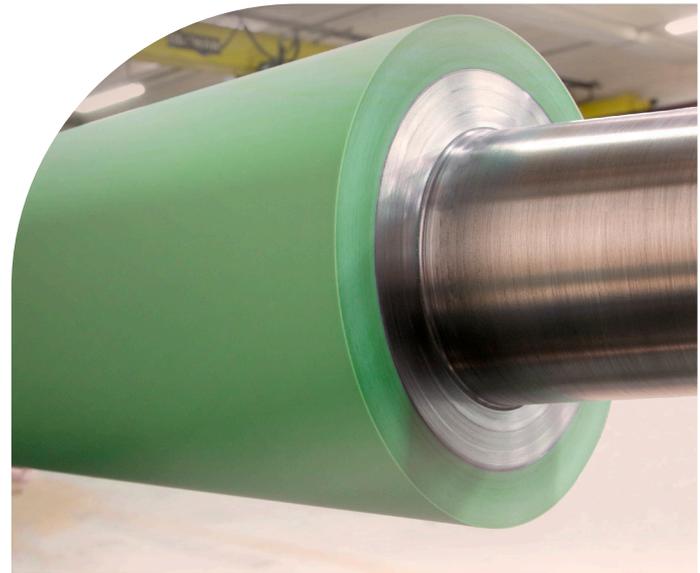

**roller covering & services
for metal coil coating applications**

Over the last decades, we have helped hundreds of clients and covered more than 100.000 rollers in the metal & steel industry

ROLLERS FOR COIL COATING MACHINES

The heart of the coil coating machine, used to apply liquid coatings, consists of the applicator roller, which is elastomer covered. This roller has a crucial impact on the quality of the coated product. The Hannecard Group has become a specialist throughout Europe and even worldwide, thanks to the development of superior covering solutions for those rollers including technologies and compounds that assure an important improvement of the coil coating process.

MONKAL® : THE COATING SOLUTION FOR ALL YOUR APPLICATOR ROLLERS

After years of research and due to the stringest demands of the coil coating industry, Hannecard created Monkal®, especially designed for metal coating applications like colour coating, chemical coating, lacquering and varnishing.

The Monkal® coatings combine extreme purity with high and consistent performances. Thanks to its worldwide production, its unrivaled purity, the combination with special concepts and the unique covering range, Monkal® is today the most sold roller covering technology in the world for coating applications.

WHY CHOSE FOR HANNECARD ?

WHY CHOSE FOR THE MONKAL® COATING ?

- High cut & wear resistance
- High abrasion resistance
- Good solvent resistance
- Excellent oil & grease resistance
- Easy to grind & groove
- Long lifetime
- high surface energy
- Best roller covering technology in the world for coating applications.
- Surface tension properties that improve the spreading and transfer of the coating
- Available from 15 up to 70 Shore A
- Surface roughness (Ra) between 0,3 and 3,5 µm

- Latest coating technology & machines, state of the art machinery
- Best price quality
- Full roller maintenance and management: assembly/disassembly of couplings and bearing houses, inspection, repair, dynamic balancing, protection coating, packaging and more
- Lab testing for chemical resistance
- More than 100 year of know how
- more than 8 000 rollers are covered each year for the coating industry
- worldwide production

high resistant polyurethane

Good wettability

best cut & wear resistance

best abrasion resistance

HANNECARD
YOUR ROLLER EXPERT
