

The rubber belt
to shrink all fabrics

Rollin® SD

**The rubber sanforizing belt to shrink all your fabrics.
Now with new reinforced inner face.**

Rollin® SD is the new generation of shrinking belts especially developed by the Hannecard R&D laboratory team.

This new technology assures an optimum shrinkage for the most demanding fabrics. Due to its new reinforced inner face, Rollin SD® always guarantees better reliability and longer life for your rubber belts.

Key Performances

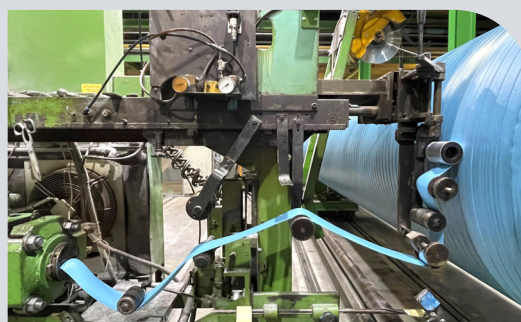

- Multilayer structure
- Made of extruded strips
- Longer lifetime between grindings
- Improved mechanical resistance of the inner face (lower risk of abrasion and cracks)

Technical Specifications

- Internal development: 3962 mm
- Standard thickness: 67 mm (other thicknesses on demand)
- Width: 1000 to 3600 mm
- Hardness of outer face: 38 Shore A

Included for each order :

- A Manual for installation, use and maintenance
- A Repair kit in case of machine trouble
- Wax candles for the outer face sticking
- Technical assistance in case of troubles

Production of rubber belts
