

MultiPrint-XP

Cover Type:	Special rubber	
Possible applications:	Inking rollers Very well adapted for dry offset printing on metal can packaging for example Very well adapted for narrow web printing, possible use with conventionnal and UV inks	
Hardness Range:	45, 55 Shore A	
Available Colours:	black	
Recommended Cover Thickness:	min. 12 mm - max. 20 mm	
Temperature resistance:	Dry:	continuous 130°C / peak 140°C
	Wet:	continuous 80°C / peak 90°C
Properties and advantages:	Very good mechanical properties: excellent abrasion resistance High chemical stability: good resistance to acids and alkaline products High heat resistance	
Chemical resistance:	Acid solutions:	Excellent
	Alkaline solutions:	Very good
	Hot water and steam:	Very good
	Ozone:	Very good
	Oil and grease:	Moderate
	Aromatic solvents (toluene, benzene,...):	Not suited
	Chlorinated solvents:	Not suited
	Polar solvents (MEC, ether, acetate,...):	Not suited
Recommended cleaning products:	Water and compatible solvents
