

PressoGraf-XP

Cover Type:	Polyurethane	
Possible applications:	Pressure roll for rotogravure printing in flat cardboard industry	
Hardness Range:	80, 90 Shore A	
Available Colours:	black	
Recommended Cover Thickness:	min. 10 mm - max. 20 mm	
Temperature resistance:	Dry:	continuous 80°C / peak 90°C
	Wet:	continuous 50°C / peak 60°C
Properties and advantages:	Excellent abrasion resistance Very good resistance to cut and tear Very good resilience which gives this coating very good resistance to pressure	
Specific characteristics:	Antistatic	
Recommended cleaning products:	Water and compatible solvents
