

FeedCart-XP

Cover Type:	Polyurethane	
Possible applications:	Feed rollers on corrugated cardboard machines Drive rollers and wheels	
Hardness Range:	40, 45 Shore A	
Recommended Cover Thickness:	min. 10 mm - max. 20 mm	
Temperature resistance:	Dry:	continuous 70°C / peak 80°C
	Wet:	continuous 30°C / peak 40°C
Properties and advantages:	Polyurethane with excellent mechanical properties for low hardness applications Very good abrasion resistance Good deformability with low remanent deformation Very good oil and grease resistance Low resistance to hot water, acid solutions and oxidative solutions	
Chemical resistance:	Acid solutions:	Not suited
	Alkaline solutions:	Not suited
	Hot water and steam:	Not suited
	Ozone:	Good
	Oil and grease:	Very good
	Aromatic solvents (toluene, benzene,...):	Moderate
	Chlorinated solvents:	Not suited
	Polar solvents (MEC, ether, acetate,...):	Not suited
Recommended cleaning products:	Water
