

Cover Type:	Special rubber
Possible applications:	Metering roll in ink fountain of rotogravure printing machines
Recommended Cover Thickness:	min. 10 mm - max. 25 mm
Temperature resistance:	Dry: continuous 100°C / peak 110°C Wet: continuous 90°C / peak 90°C
Properties and advantages:	Excellent resistance to water, ozone and bad weather conditions Very good resistance to ketone solvents and acetates Low resistance to oil and grease This coating can be laser engraved
Chemical resistance:	Acid solutions: Excellent Alkaline solutions: Excellent Hot water and steam: Very good Ozone: Excellent Oil and grease: Not suited Aromatic solvents (toluene, benzene,...): Not suited Chlorinated solvents: Not suited Polar solvents (MEC, ether, acetate,...): Very good
Recommended cleaning products:	Water and compatible solvents
Remark:	Alveoli obtained by laser engraving on the DOSERIGHT roll allow a uniform inking, at any line speed, but also a better distribution of low ink volume. Cleaning operations are shorter and ink consumption less important
